Features and benefits

- | FN 2090 two-stage filters are designed for easy and fast chassis mounting.
- | The FN 2090 filters are also available as B versions with no Y-capacitors for medical applications as well as A versions with low capacitance for safety critical applications with a requirement for low leakage currents.
- | All filters provide an exceptional conducted attenuation performance, based on chokes with high permeable core material and excellent thermal behavior.
- | FN 2090 two-stage filters are designed for noisy applications requiring excellent filter performance.
- | The higher inductivity versus amperage offers increased attenuation performance with the same form factor compared to FN 2060 and FN 2080 filter series.
- | All FN 2090 filters can be delivered with optional surge pulse protection.
- | FN 2090 filters are also available as singlestage filters (FN 2030 series).
- | Various terminal options allow you to select the desired connection style.
